

## Schools

Together with the Department of Education and Training, the Water Corporation is conducting audits at government and non-government school education institutions identified as high water users. These schools will then be encouraged to become a waterwise school by engaging in the Waterwise Schools Program curriculum.

Schools which already form part of the Waterwise Schools Program in Western Australia will also be audited to establish further steps to improve their water efficiency.

For more information on becoming a Waterwise School, visit the [website](#) or contact the Water Corporation on 9420 2681.
