

Waterwise Lawnmowing Contractors

The Waterwise Lawnmowing Contractor (WWLC) program was launched in 2007 by the Water Corporation and the Lawnmowing Contractors Association of WA (LMCA), to support behavioural changes in the community by encouraging the use of products and services designed to maximise water usage.

Part of the eligibility criteria for the program requires all lawnmowing contractors with direct customer contact to undertake Waterwise training. This ensures that WWLC's are able to provide advice to their customers on Waterwise gardening and basic Waterwise irrigation information.

The training is organised by the Water Corporation and facilitated by a local gardening expert, such as John Colwill or Chris Ferreira. To participate in the program interested Lawnmowing Contractors should contact LMCA on 9358 4811 if they are a member or if not a member, contact the Water Corporation on 9420 3507 or email water.efficiency@watercorporation.com.au
