Product/device description

The Halgan Modular Grease Trap “R” Series (MGTR) is manufactured from polyethylene and is available in three sizes with capacities of 6000, 8000 and 10,000 litres with the internal Surge Control Device (SCD). All MGTR units have a SCD unit installed at the outlet end. The SCD is designed to stabilise high surges and acts as a final filtration of the wastewater before leaving the pre-treatment device.

Any proposed installation of a MGTR 6000, 8000 or 10,000 unit is first subject to a formal Water Corporation Trade Waste plumbing assessment (and approval) of the overall waste stream processes to determine if the MGTR 6000, 8000 or 10,000 unit is the most appropriate form of pre-treatment. The MGTR 6000, 8000 or 10,000 units can only be installed as single units.

All models are for below ground use only. Only individual stand-alone units can be installed. All models can be configured with Class B or Class D lids.

The approval certificate applies to the pre-treatment devices of the following sizes:

Special conditions of approval

1. The product shall be supplied with manufacturer’s installation instructions and recommended procedures for operation and maintenance.
2. The product shall be installed and maintained strictly in accordance to the following Halgan documentation:
3. This approval certificate is not a stand-alone document and must be read in conjunction with the following Water Corporation documents:
   a. Typical Drawings for Trade Waste – Grease Arrestor (HX33-10-00)
   b. Grease Arrestor Installation Guidelines (PUB-23-B)
4. A maintenance contract is to be in place to ensure the ongoing reliability of the product.
5. Water Corporation must be notified within fourteen (14) days upon installation of the product
6. The use of emulsifying agents upstream of the product must not occur. Such instructions must be noted on operating documentation.
7. The product chosen must be suitably sized to avoid surge conditions.
8. Clear access for the purposes of maintenance or servicing of the pre-treatment device must be maintained at all times.
9. This approval certificate is not an endorsement of the product by Water Corporation, and no claim shall be made in advertising, promotion or other manner to the effect.
10. Water Corporation accepts no responsibility for the effective operation, performance or efficiency of the product. This approval is not an engineering approval or structural endorsement.
11. The proponent of the approved product must formally seek a request for re-approval of the product no later than three (3) months before the assigned Validity Period has expired from the Date Issued of this approval certificate.
12. Water Corporation reserves the right to vary any requirements at any time. Any application of this condition normally occurs after consultation with the manufacturer, supplier and end business user connected to Water Corporation’s sewer.
13. Water Corporation shall be notified in writing if the pre-treatment device is withdrawn from sale.
14. The proponent of the approved product accepts that the information provided in this document shall be made publically available.

Trade waste pre-treatment product

General conditions of approval

Approval shall be **suspended** where any of the following conditions are not met:

1. If there is a breach of the Special Conditions.
2. The assigned **Validity Period** has expired from the **Date Issued** of this approval certificate.
3. The product shall be manufactured in accordance with Water Corporation’s requirements at the time of approval.
4. The product shall be manufactured to comply according to the details noted in drawing MGTR-WA (Rev A, dated 8th Dec 2017), in addition to any further details provided by the proponent when seeking this approval.
5. The product supplied for use in Water Corporation’s area of operations shall comply with the requirements shown on this approval certificate. Sizes, classes, lengths or other product variables which are available with the product but which are not approved as listed on this approval certificate shall not be offered by the supplier for use in Water Corporation’s area of operations.
6. All discharges to sewer associated with this product must not exceed Water Corporation’s **Trade Waste Acceptance Criteria**.
7. Prior to any business (which is connected to Water Corporation’s sewer) installing this product the business must apply to Water Corporation for a **Trade Waste Permit** for approval to discharge.
8. If this certificate has been issued to the manufacturer of this product then it is the responsibility of the manufacturer to ensure all current and future suppliers / vendors of this product are provided a copy of this approval certificate.

Approval shall be **reviewed** where any of the following conditions occur:

1. The product is manufactured with either different materials, methods of manufacture, location of manufacture, source of raw materials, component subcontractors or models to that at the time of approval.
2. The ownership of the primary manufacturer or any subcontractors is varied from that at time of approval.
3. The standards and/or specifications to which the product was required to comply with at the time of approval have been amended or revised.
4. The product has been found to sustain damage or provide unsatisfactory performance on occasions of number considered excessive by Water Corporation, when handled, stored, assembled or installed in accordance with the supplier’s or manufacturer’s written instructions.
