1. **General**

1.1. Tank constructed from Polyethylene.

1.2. Is to be installed in a location that will not cause a nuisance, obstruct fire access, cannot be vandalised or be damaged by vehicles.

1.3. Must have ease of access to pumpout point for maintenance.

1.4. Non-standard installations require Halgan approval.

2. **Installation above ground**

2.1. The Halgan Tanks to be supported on a 100mm thick concrete pad.

2.2. Any maintenance platform must be installed in accordance with Australian Standard 1657-1992 allowing safe access while inspecting and maintaining.

2.3. All pipes connecting shall be fully supported; there shall be no stress on the tank connections.

2.4. All stormwater must be diverted away to prevent undermining of foundation.

---

**Plan View**

- Grease trap vent
- Access lid
- Inlet (1"")
- Outlet (1"")
- Surge control device (SCD) service riser (bolted to wall)
- Water level during normal operation
- Air tight sampling point - screw cap

**Elevation**

- Surge control device (SCD)
- Length dimensions vary depending on volume of grease trap
- Ground vents not permitted
- 50mm vent (to free air)
- All disconnector gullies and fixtures traps on the outlets to all food and oil interceptors must be sealed and vented to avoid offensive odours during discharge. Refer typical drawing HK33-11-30
