

Environment Policy

Striving for Zero Footprint

The Water Corporation provides essential water, wastewater and drainage services to the people of Western Australia. These services include construction, operation and maintenance of assets. We take water from the environment and return drainage water, treated wastewater and its by-products to the environment. We are committed to protecting and enhancing the environment. We will comply with our environmental obligations, reduce our environmental impact, prevent pollution and continually improve our environmental performance.

We will strive for Zero Footprint by:

1

Managing risks

We are all responsible for identifying and addressing environmental risks and potential incidents.

2

Taking personal responsibility

We are all responsible for protecting the environment and understanding and meeting our environmental obligations.

3

Improving performance

Our environmental objectives include reducing native vegetation clearing, reducing greenhouse gas emissions, reducing water use and increasing recycling of wastewater. We set targets to continually reduce our environmental impact and improve our environmental performance. We regularly review performance against targets.

4

Maintaining an effective system

Our Environmental Management System provides the framework for setting and reviewing our environmental objectives and targets and continually improving our environmental performance.

This policy applies to all employees and contractors of the Water Corporation and includes all activities and services we provide, in accordance with our operating licence. We will provide the necessary resources, systems, training and mechanisms to improve our environmental performance.

Sue Murphy
Chief Executive Officer, Water Corporation
