Shenton Street water main renewal: Work starting week of 4 March 2019

Since July 2016 Water Corporation's Pipes for Perth program has been proactively replacing ageing water mains across metropolitan Perth, including City of Perth.

Water Corporation will soon start work to replace around **3.2 kilometers** of water mains across Northbridge, Perth, Highgate and Mt Lawley.

This includes **Shenton Street** in Northbridge between Aberdeen Street and James Street.

For the full list of streets to be renewed in 2019, please visit watercorporation.com.au/PipesforPerth.

Please read this information sheet which includes important information about how this work will impact you.

Where is this happening?

Construction work will start at the intersection of Shenton Street and Aberdeen Street and will progress south towards James Street.

Security fencing and all construction work will take place in the northbound lanes on Shenton Street. Both the parking lane and the northbound traffic lane will be closed during construction.

Both Shenton Street southbound lanes will temporarily be used to allow traffic to flow in both southbound and northbound directions. Please note there will be no onsite parking during this time. Traffic management will be in place to ensure the safety of workers and the community.

We will endeavour to maintain full access to all residential properties and businesses. We will speak with you directly to make alternative arrangements should we need to restrict any property access.

When is this happening?

Construction of the new water main will begin the week of **4 March 2019** and is expected to take up **to five weeks** to complete. Work will be carried out Monday to Saturday between 7am and 7pm.

Our authorised contractor, Civcon, will be in the area before construction to locate underground services i.e. telecommunications, gas, electrical etc. prior to construction work starting. This work will require some small excavation work. Traffic management will be in place, as required.

Customer impacts and notice

Customers will be notified in advance when driveway accesses are to be impacted, work is to be carried out outside of normal works hours or a water supply interruption is occurring. Please note that water supply interruptions will be carried out outside of operating hours for business impacted.

Our process

Renewing water pipes is a complex and detailed process. Some of this work includes locating underground services, laying the new pipe, pressure and water quality testing and most importantly, connecting the new pipe to the water network. While it may not always look like work is happening, rest assured, this is reflective of a standard construction process.

Our contractors use a combination of construction methods, including trenchless and open excavation. Unfortunately, construction work of this nature means unavoidable impact to roads, footpaths and verges. All impacted areas are backfilled and reinstated to City of Perth standards.

Business visits

If you would like to meet with a member of the project team to discuss this work further, please email PipesforPerth@watercorporation.com.au. Alternatively, a member of the team will visit all businesses along the pipeline route before construction starts.

Sign up for project updates

We are committed to providing customers with important updates throughout project delivery. To ensure you're receiving the most up to date project information available, we encourage all customers to register their details with us online. Regular updates will include any changes to traffic management, property access and/or the project schedule.

Register your details for email updates at watercorporation.com.au/pipesforperth.

More information

We encourage customers to visit the Pipes for Perth Northbridge and Perth webpage which includes important information about construction schedule changes, project maps, customer notifications and traffic management plans; watercorporation.com.au/pipesforperthNorthbridgePerth2019.

Alternatively, please contact our dedicated Pipes for Perth Customer Solutions team on **9420 3529**, available weekdays during business hours, email pipesforperth@watercorporation.com.au or visit us online at watercorporation.com.au/pipesforperth.

We understand this essential work is disruptive to the local community. Thank you for your patience and cooperation during this temporary inconvenience.
